

ENTERPRISE-LEVEL DATA WITHOUT THE ENTERPRISE COST

## ALL THE MALWARE DATA, NONE OF THE GIMMICKS

In the fight against malware, security companies need access to the newest and most complete information, coupled with in-depth historical data and analytical tools. Until now, this meant paying huge sums of money for enterprise platforms or trying to squeak by with free, open-source feeds. vxIntel changes that. Our Malware Intelligence Platform provides the data and tools security companies and researchers need at a cost that makes sense.

### PRODUCT HIGHLIGHTS

Up to 500K unique malware files per day, at a fraction of the cost of competitors

**+10TB**  
NEW DATA MONTHLY

Key analytical tools such as Sandbox and YARA searching, built right into the platform

**-75%**  
COST OF ACCESS TO  
SANDBOX & YARA

Access to 10+ years of historical data for special research projects

**+500M**  
UNIQUE HISTORICAL  
SAMPLES

### WHO IS VXINTEL FOR?

vxIntel is the perfect choice for security companies and malware reversers who need quality malware data and analytical tools without paying for the feature-creep and high overheads of other enterprise platforms.

We need the latest and most complete malware data available to help power our cybersecurity platform. vxIntel is the perfect choice for us because it provides all the latest malware data reliably - at a cost that makes sense in our business model.
